

# Fully Integrated Electronic Plan Review for Infor Public Sector

## KEY BENEFITS

- Cloud-based, DigEplan is configured in days
- Efficient electronic plan review & approval processes integrated to Infor
- Simplified IT real estate as no database or desktop applications are required
- Supports green initiatives
- Improve permit turnaround time
- Compliance with Federal legislative policies
- Collaboration with developers, contractors & architects
- Accelerate permit request & processing time
- Simultaneous permit reviews
- Improve service delivery to citizens & commercial organizations
- Improve traceability and audit trails
- Maximize existing Infor investments
- Access critical document information from Infor processes & screens

DigEplan, electronic plan review for Infor provides an efficient, flexible, and secure method for states, counties and cities to streamline electronic plan review and accelerate permit application processes, removing the need for paper, complex third-party integrations or disconnected PDF mark-up tools.

## Further exploit your Infor investment

Cities, counties and other public sector organizations can further exploit their investment in Infor when adding DigEplan. DigEplan enables Infor users to efficiently work with electronic plans that need to be viewed, commented upon, stamped, and rejected or approved. Infor users can instantly access plans and other supporting documents for analysis, viewing, annotation, stamping, printing, and archiving, removing the need for paper or cumbersome desktop PDF tools.

DigEplan is fully integrated to Infor so all interactions with the plans is recorded and available in Infor

## Reduce complexity and simplify your IT real estate

DigEplan for Infor does not require a separate portal, workflow, database, client installs, or file upload / download as it is fully integrated into your Infor document management, screens, workflows and tasking, reducing complexity and providing an integrated user experience. Managing duplicate functionality for workflow, document management and portals alongside complex third-party integrations is an overhead on day-to-day operations and creates complexity in customer support.

## Lightening performance and reliability removing the need to triage plans

DigEplan's performance is comparable with desktop PDF viewing applications, but with all the advantages of full integration. This allows organizations to work with large plan sets experiencing high performance for page loads and sheet navigation with engineering grade reliability. No more wait time, file opening issues or triage for plans required.

DigEplan enables users to work with electronic plan review cycles from within Infor

## Remove inefficient, non-integrated PDF desktop tools

Permit applications are typically reviewed by multiple departments within a city and external stakeholders. Traditionally, with paper-based processes or non-integrated desktop PDF tools, reviews were completed in a consecutive manner with the application being passed around to each reviewer. Desktop-based PDF tools require users to download and upload plans, and supporting documents, alongside a significant amount of manual data entry. This slow and inefficient practice leads to delays and less than timely approvals.

Using a fully integrated electronic planning review tool for Infor, reviewers can simultaneously review planning applications without any downloads, add their digital comments, and redlines at the same time. This serves to standardize, streamline and accelerate workflows for the electronic planning process.

DigEplan for Infor provides a rich set of engineering grade annotation features that allow reviewers to communicate, comment and add in-context observations and instructions, directly within plans and supporting plan documents.

Quickly and easily spot hard to see differences in subsequent review cycle

## Instantly analyze resubmitted plans with the comparison and overlay function

The compare capability allows users to instantly determine what has been added, removed, or changed in documents. This is particularly useful during the review of resubmitted plans or documents. Hard to spot differences between the original file and subsequent resubmittals can be easily identified, saving time and quickly catching accidental or intentional changes beyond what was requested.

## Increased productivity and simplified submission standards with sheet management

DigEplan support the management of plans at a sheet level, removing the need to force applicants to resubmit entire plan sets at each cycle, or requiring plans to be split on upload, which is complicated and cumbersome.

Sheet management is automatic with DigEplan, so applicants and plan reviewers do not need to split plans on in-take

## Intelligent and batch stamping processes

Reviewers can apply Intellistamps to electronically sign and stamp document sets with attributes from Infor. Intelligent stamps retrieve and insert information from Infor, enabling quick approvals and digital sign-off. The sign-off stamp contains information about the annotation author, CASE ID, date and time of creation, providing a reliable audit trail of changes and approvals.

DigEplan Intellistamps uses Infor meta-data that supports electronic sign-off

## Automatically extract correction comments from plan review cycles, combined with the plans with revisions required sheets

Once a document has been reviewed in DigEplan for Infor, the details of any correction comments can be extracted from the marked-up plans and used to populate the Infor comment tracking module and report. This allows comments to be tracked through multiple review cycles.

Correction reports, that can be created based on the review status, all available in the Infor record and citizens access

## Digital comment management using Civics a fully electronic process for correction comment management

Using DigEplan for Infor, correction comments can flow from the plan review process, through the back office and made available in Civics where applicants can respond directly.

Correction comments can be published to applicants where they can respond electronically, greatly reducing administration and improving plan review correspondence

## Rapid configuration and go-live with DigEplan for Infor

DigEplan for Infor is configured by certified, highly experienced delivery partner TruePoint Solutions, with elapsed go-live times of less than 90 days, and less than 30 where workflows, Civics and the back office is already configured.
