

# Fully Integrated Electronic Plan Review for Cityworks PLL

## KEY BENEFITS

- Cloud-based, DigEplan is configured in days
- Efficient electronic plan review & approval processes integrated to Cityworks PLL
- Simplified IT real estate as no database or desktop applications are required
- Supports green initiatives
- Improve permit turnaround time
- Compliance with Federal legislative policies
- Collaboration with developers, contractors & architects
- Accelerate permit request & processing time
- Simultaneous permit reviews
- Improve service delivery to citizens & commercial organizations
- Improve traceability and audit trails
- Maximize existing Cityworks PLL investments
- Access critical document information from Cityworks PLL processes & screens

DigEplan fully integrated electronic plan review for Cityworks PLL provides an efficient, flexible, and secure method for states, counties and cities to streamline electronic plan review and accelerate permit application processes, removing the need for paper or desktop PDF tools.

[Enhance your Cityworks PLL investment with out of the box, fully integrated DigEplan electronic plan review.](#)

Cities and other public-sector organizations can further exploit their existing investment in Cityworks PLL when using DigEplan. DigEplan enables Cityworks PLL users to efficiently work with electronic plans that need to be viewed, commented upon, stamped, and rejected or approved. The integration to Cityworks PLL allows users to instantly access plans for viewing, annotation, stamping, and corrections, removing the need for paper or disconnected PDF tools.

DigEplan for Cityworks PLL enables plan review stakeholders to work with electronic plan review cycles directly from Cityworks PLL

[Remove costly, duplicating, inefficient applications](#)

DigEplan for Cityworks PLL does not require a separate workflow, document manager, database or client installs. It completely eradicates file upload / download as it is integrated into your Cityworks PLL screens and tasks. This reduces IT complexity, minimizes the cost of ownership, and simplifies plan review processes.

## Streamline plan review for your Cityworks PLL plan reviewers

Planning applications are typically reviewed by multiple departments within a city or external stakeholders, such as utilities, fire and other authorities. Traditionally, with paper-based processes or non-integrated desktop PDF tools, reviews were completed in a consecutive manner with the application being passed around to each reviewer. This slow and inefficient practice leads to delays and less than timely approvals.

With DigEplan for Cityworks PLL electronic plan review, users can simultaneously review, adding their digital correction comments and instructions at the same time. This serves to standardize, streamline and accelerate workflows for the electronic planning process.

DigEplan uses the standard portal, workflows, document management and tasking of Cityworks PLL

## No compromise on features and deep integration to Cityworks PLL

DigEplan for Cityworks PLL provides a rich set of annotation entities that allow plan checkers to communicate, comment and add in-context annotations and instructions, directly within plans and other document types, such as Native CAD formats DWG, DGN, DXF and DWF. All annotations are created as distinct overlays on top of the original file, never altering the original, and are saved directly into Cityworks PLL for audit purposes.

Plan reviewers and departments can turn annotation layers on and off to make life easier, consolidate comments as needed to make decisions, and provide correction comment reports, supporting review cycles with the relevant stakeholders.

## Instantly analyze resubmitted plans with the compare and overlay feature

The compare and overlay capability allow users to instantly determine what has been added, removed, or changed in documents. This is particularly useful during the review of resubmitted plans in subsequent review cycles. Hard to spot differences between review cycles can be easily identified, saving time and quickly catching accidental or intentional changes beyond what was requested.

Quickly & easily spot hard to see differences in subsequent review cycles

## Intelligent and batch stamping processes

Reviewers can apply intelligent stamps to electronically sign and stamp document sets with attributes and meta data, pulled directly from Cityworks PLL. Intelligent stamps retrieve and insert information from Cityworks PLL, enabling quick approvals and digital sign-off. The sign-off stamp contains information about the annotation author, department, CASE ID, date and time of creation, providing a reliable audit trail of changes and approvals, creating a visual footprint on the plans. Users can accelerate the approval process further with the en masse, batch stamping and status updates to Cityworks PLL.

DigEplan for Cityworks PLL Intellistamps, uses Cityworks PLL meta-data that supports electronic stamping and sign-off
